More! More! More territory! Take it all with new amazing game - Paper.io 3D This game concept is linked to old Xonix, which appeared in 1984. Like in any other IO game there are you and enemies willing to outwit you. But you'll prevail of course :) Take their territory and destroy your enemies, but be careful, your tail is your weak point. This game is very cool and has nice paper-like graphics and fluid animation. Enjoy! You can play paper.io online and offline both on a mobile device and a desktop computer. Get paper.io and join the world gaming community. Manage a small board and win territory from your rivals. Paper.io 2 - behold the sequel to the popular game. Capture new territories and become the king of the map! The more space you win the higher ranking and scores you get. You have to act and think quickly. Develop your own strategy and action plan. Paperio has simple rules but is very addictive in its simplicity. The competitors are also on guard. Watch out for your tail. The game is very addictive and makes gamers from all over the world connect from home, from work, from campus or even the office! Join the game, figure out your strategy and become the ultimate winner. Have fun! Welcome to the new exciting addition to the Paper.io 2 universe – the World Conflict mode. Challenge other players from around the globe in the ultimate fight for territory. This time every player will be representing not only themselves but their whole country! Conquer the land in the usual paper style, just keep in mind that every little piece is going to be added to the rating of your homeland. The more users play for a certain country and the better they do - the higher its score will be in the leader boards. The movement is automatic - all you need to do is steer in the right direction. Capture territory by making a circle (or any other shape as long as you close the line you started) with a colored trail your character leaves behind. If someone cuts into the trail while you're in the middle of drawing the line, you will die and have to start over. The good part is you can do the same to other players, just be careful not to get outsmarted. Are you ready to show the world how powerful your country really is? Time to play World Conflict mode, enrich your motherland and defend it from invaders! Paper.io 2 Teams takes the experience of the world's most beloved multiplayer .io game to a whole new level. Now you can capture territory, defend your land and attack other players together with a team of comrades from around the world! The battles take place on a giant paper circle representing a globe, so the stakes are higher than ever. Can you paint the world into your color, outsmart the enemies and dominate the server? All your favorite mechanics are still present: draw a line by moving your character around to add a piece of paper to your territory – it will be automatically captured and painted into your color, as soon as the line is finished. The enemies will try to do the same, but you can counter-attack by breaking their lines before they are completed – doing so will also destroy the unlucky opponent. Be careful not to fall into the same trap: always try to stay close to your paper lands and cooperate with your teammates by adding smaller chunks of territory at a time. It's easy to track your team's progress by looking at the chart on the bottom right that states the percentage of territories occupied by the players. To assure your victory, work together with your comrades, eliminate rivals and capture 100% of the paper globe. See you in Paper.io 2 Teams online battles! Welcome to the new Paper.io World Map mode! This time the territories you capture are real geographical locations. Draw your outline around (or through) oceans and continents, rivers and mountains, cities and villages. Add actual countries, like the United States, Russia, and China to your kingdom. Conquer your enemies' lands piece by piece, and watch out for the safety of your own borders. Can you beat everyone, and become the sole ruler of the planet? The gameplay of Paper.io 2 World Map is almost the same as the original: direct your marker by moving the mouse cursor, or dragging your finger across the screen, draw the outline of the territory you want to capture and see the area get filled with your color as soon as you close the gap. Don't go to far away from your land: you are vulnerable while the line is unfinished. Watch out for other players trying to take what's yours: intersect their trajectory before they finish the maneuver, and kill them. Have fun taking over the world!
